Seasonal Change

Year 1/2

What should I already know?

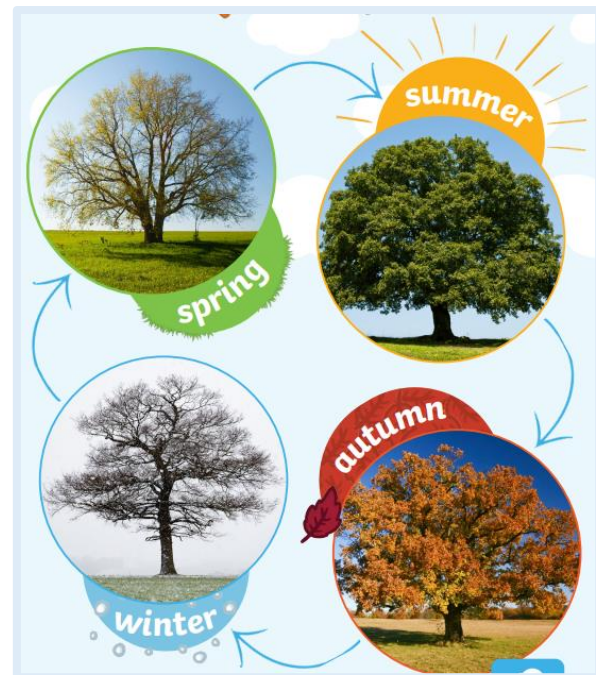

- I can name the four seasons autumn, winter, spring and summer.
- I can spot signs of autumn, winter, spring and summer

Tier 3 Vocabulary

Seasons	Day Length
Vary	Weather

What will I learn?

- There are four seasons, autumn, winter, spring and summer
- Autumn occurs during September, October and November
- Winter occurs during December, January and February
- Spring occurs during March, April and May
- Summer occurs during June, July and August
- The amount of day light we have depends on the season we are in
- The weather changes depending on the season we are in

Types of Enquiry

Observing changes over time

Pattern seeking

Identifying, groups & classifying

Comparative and Fair testing

Research

Working Scientifically Skills

How will I be a scientist?

Plan

Do

Record

Review

To spot changes within the seasons

Observe the weather each day

We will record the weather each day

We will observe how the weather changes over time

To observe how the weather changes with the seasons

Go on a seasonal sensory walk and spot signs of each season

We will take photographs to compare the year

We will be able to discuss how each season is different
