

Biology

Animals Including Humans

Year 1/2 – Summer

What should I already know?

I can tell you the names of some animal babies.

I can tell you how to take care of some pets.

I know that I was once a baby and I can do more things now I am a child.

What will I learn?

Animals and humans need water, air, food and shelter to survive.

Animals and humans have offspring which grow into adults.

I can tell you about an animal lifecycle and the lifecycle of a human.

Types of Enquiry

Observing changes over time

Pattern seeking

Identifying groups & classifying

Comparative and Fair testing

Research

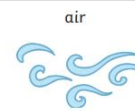

Tier 3 Vocabulary

Life Cycle

Survival

Offspring

To stay alive, all animals have three basic needs for survival:

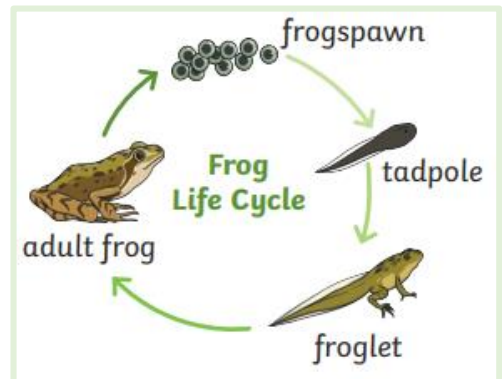

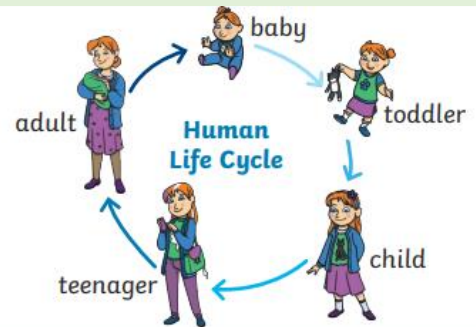

air

water

food

Working Scientifically Skills

How will I be a scientist?

Plan

I will research what the basic needs of animals and humans are

I will learn about animal and human lifecycles

Do

I will identify the basic needs of animals and humans

I will observe an animal lifecycle

Record

I will observe over time what happens to an animals during their life stages and create a life cycle

Review

I will review what the basic needs are of animals and humans and identify what might happen if these needs are not all met
